

Dermatopathology

At HNL Lab Medicine, our board-certified Dermatopathologists work directly with referring physicians to accurately diagnose common, unknown, rare, complex, and chronic conditions. Our Dermatopathologists have additional molecular board certification, GYN fellowship training, and oncologic pathology fellowships.

To stay ahead of the curve, Dermatopathologists share expertise and actively participate in tumor boards to discuss best current practice of diagnosis and management of cutaneous malignancies.

Additionally, we have board-certified Hematopathologists and soft tissue pathology experts available for consultation.

Dermatopathology Testing

HNL Lab Medicine has a robust in-house Immunohistochemistry test menu. Additionally, our Dermatopathologists are well-versed in the diagnosis of a wide-range of pathologic conditions, such as:

CUTANEOUS
TUMORS

LYMPHOMAS

MELANOCYTIC
NEOPLASMS

VASCULITIS

AUTOIMMUNE
CONDITIONS

IMMUNOBULLOUS
DISORDERS

Why Work With Us?

Easy access to Dermatopathologists for questions, case review, and discussion

Unsurpassed precision and quality

We perform the right tests to meet the unique needs of every patient. Ancillary testing is kept to medical necessity to limit out-of-pocket expenses for the patient

Tailored reports with emphasis on clinical pathologic correlations
