

How well do you know allergies?

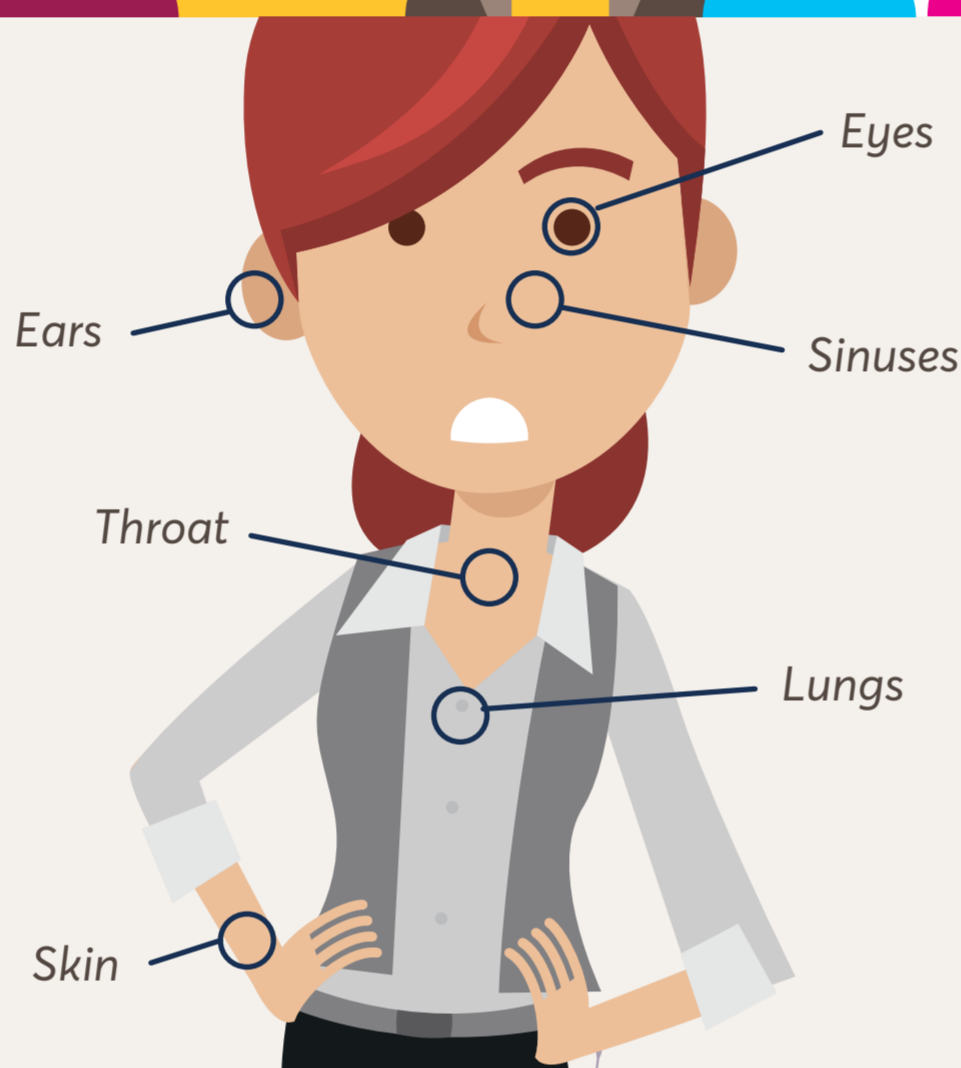

Even if you don't know the cause, you know what they do to your face.

Allergies affect as many as 2.6 billion worldwide
30-40 percent of all people¹

The discomfort of allergy symptoms can be felt all over your body

Annually, the U.S. spends **\$1.8 billion** on over-the-counter allergy medications to get relief.²

Depending on the time of year, **pollens**

from grasses, weeds, and trees can release tiny particles into the air which may travel for hundreds of miles.

Indoor **allergens**

from dust mites, pets, and mold can affect people year-round.

insects

dust mites

dogs

grasses

trees

cats

weeds

mold

mice

fungus

So, which of these may be causing your symptoms? The only way to really know is with a test. One simple blood test can help identify unknown allergic causes of your symptoms so you can get some relief.

Skip the trip to your provider, and order your Allergy tests today:
